^{*2} Above code shows model number of driver only. Refer to outline drawings for model number of sensor and extension cable.

	SPECIFIC	CATIONS					
CALIBRATION MATERIAL	JIS SCM440 flat surface	TEMPERATURE	Sensor : Less than ±3% of F.S.				
MEASURING RANGE	0.5mm to 5.0mm from sensor tip	CHARACTERISTIC	Extension Cable : Less than ±3% of F.S.				
SENSITIVITY*3	3.94V/mm	(TEMPERATURE DRIFT)	Condition : Gap=4mm, Target : JIS SCM440				
SENSITIVITY ERROR*3	Within ±4%	1`	0 to 80°C (at 20°C standard)				
SCALE FACTOR ERROR*3	Within ±6% of 3.94V/mm (if calibrated as a system) Within ±10% of 3.94V/mm (including interchangeability errors)		Driver : Less than ±3% of F.S. Loop : Less than ±4% of F.S. Condition : Gap=4mm, Target : JIS SCM440				
	Step: 0.5mm, Linear range: 4mm		0 to 60°C (at 20°C standard)				
LINEARITY*3	Within $\pm 50 \mu m$ of 3.94V/mm straight line : (if calibrated as a system) Within $\pm 100 \mu m$ of 3.94V/mm straight line : (including interchangeability errors)	POWER SUPPLY	30 to 95% RH (non-condensing, non-submerged) (Sensor body: 100%RH) -24VDC ± 10% Between each terminals and mounting plate:				
	Linear range : 4.5mm	STRENGTH OF DRIVER	1mA or less at 500VAC for one minute				
FREQUENCY RESPONCE*3	DC to 10kHz (-3dB)	INSULATION	Between each terminals and mounting plate :				
MAX. OUTPUT VOLTAGE*3	Approx23VDC	RESISTANCE OF DRIVER	100MΩ or more at 500VDC				
SENSOR ABNORMAL OUTPUT VOLTAGE*3	Approx0.6VDC (Sensor OPEN/Sensor SHORT)	APPLICABLE WIRE SIZE	Screw type terminal block (M4) : 0.75 to 2mm ² Spring lock terminal : 0.2 to 1.5mm ²				
OUTPUT IMPEDANCE*3	50Ω Current 5mA(max.)	DRIVER MASS	Approx. 200g				
CURRENT CONSUMPTION (10kΩ load)	Max15mA	Other					
OUTPUT NOISE*3	Approx. 20mVpk-pk + power supply noise						
SENSOR TIP DIAMETER	Approx. 11mm dia.						
CABLE DIAMETER	Approx. 3.6mm dia.						
CONNECTOR DIAMETER	Approx. 7.1mm dia.						
SYSTEM CABLE LENGTH	5m or 9m						
OPERATING TEMPERATURE RANGE (Refer to NOTICE 9) RANGE OF TEMPERATURE AT EXPLOSION PROOF CONSTRUCTION	E40 : -40 to +80°C(Sensor, Extension Cable & Driver) E50 : -40 to +80°C(Sensor, Extension Cable & Driver) E70 : -40 to +80°C(Sensor, Extension Cable & Driver)						
RANGE OF TEMPERATURE FOR MARINE APPLICATIONS	E80 : -40 to +80°C(Sensor, Extension Cable & Driver) EB0 : -40 to +80°C(Sensor, Extension Cable & Driver) EC0 : -40 to +80°C(Sensor, Extension Cable & Driver) ED0 : -40 to +80°C(Sensor, Extension Cable & Driver) -25 to +70°C(Sensor, Extension Cable & Driver)		pply at 25°C with -24VDC power supply and JIS SCM440 target (thickness≥5mm).

FK SERIES TRANSDUCER SPECIFICATIONS

FK-452F TRANSDUCER

Page 2 of 2 **(€**

NOTICE

1. CALIBRATION MATERIAL

MODEL FK-452F Transducers are calibrated for JIS SCM440 flat surface (more than 33mm dia.).

If the measured target is other than JIS SCM440 flat surface, it will present a different characteristics. In such a case, calibration by the connected equipment e.g. monitor) side should be required for system operation.

2. SHIELD WIRE CONNECTION

Connect shield wire of signal cable (3-wire shielded cable between driver and monitor) to driver's "COM" terminal (Spring lock terminal: "Shield" terminal) and monitor's "COM" terminal.

If this is not adhered to, noise may be caused.

CONNECTOR ISOLATION, etc.

The connector connecting the sensor cable and the extension cable shall be insulated with the attached insulation sleeve (transparent shrink tube) or fluoro

The vinyl-insulating tape shall not be used, which may cause the wiring trouble in the case of temperature more than 80°C.

The connector shall not be located in the oil environment.

The oil penetration to cable through the connector may cause the sensitivity change, due to the change of the cable capacitance.

MEGGER TEST OF SIGNAL CABLE

If megger test is made on the signal cable (3-wire shielded cable), be sure to discharge the charged electric load before connecting the cable to driver. If this caution is not adhered the driver could be dameged.

5 SENSOR INSTALLATION

Not available for rain water at out door use.

It may cause the sensitivity change and insulation down.

CALIBRATED AS A SYSTEM

The sensor, extension cable and driver, which are calibrated as a system shall be connected with each serial No. as specified in the inspection test report. If this is not adhered the output characteristics may be out of specification. SCALE FACTOR ERROR and LINEARITY

The scale factor error margin and linearity margin provides for examination result in our factory. This regulated value is not applied to the examination result in the

SAFETY BARRIER

In case of the intrinsically safe specification, the approved following safety barrier is recommended.

MTL 7796-

Please use in combination with the barrier which has explosion-proof certification in the country of use.

Linear range reduces when intrinsic safety system with barrier.(to approx. 95%) OPERATING TEMPERATURE RANGE OF CONNECTOR

The operating temperature (upper limit) for connectors of the sensors and the extension cables shipped on July 31, 2011 or earlier is 125 °C.

If you are unsure of the operating temperature of your connector please contact us.

10. The instructions manual contains important information such as conditions necessary for safe handling of the system.

Such information and conditions are important and indispensable for ensuring safety. Therefore, be sure to read the instructions manual thoroughly before handling the system.

- Cable length 5.0m sensor is designed for 5m system only. Can not use for 9m system.
- In the intrinsically safe system, the product cannot be used in combination with a sensor/extension cable/driver with the intrinsically safe code "/EX□"

CONFIGURATION
